FOR IMMEDIATE RELEASE

ROAD IMPROVEMENTS TO END FLOODING ALONG CEDAR AVENUE

SAN BERNARDINO – Bloomington residents and businesses along Cedar Avenue will soon benefit from a drainage improvement project that will relieve the road from flooding and erosion.

San Bernardino County 5th District Supervisor Josie Gonzales and her colleagues today unanimously approved the contract for the project. Construction is scheduled to begin the last week of this month and take approximately 30 days to complete.

The project will include constructing a new catch basin along Cedar Avenue, just north of Fifth Street, and installing new drainage pipes connecting a proposed modified outlet structure at the northeast corner of Fifth Street and Cedar Avenue.

“After hearing local business owners’ and residents’ concerns about the flooding, my staff immediately started to work with the County’s Public Works department to solve the problem,” said Supervisor Gonzales.

“Good job residents! I encourage this type of partnership between you and my office,” said Gonzales. “As our added eyes and ears, you all can help us identify projects that need the County’s attention.”

This project is among a series of planned construction projects designed to improve drainage and traffic safety along Cedar Avenue in Bloomington.

The 5th District includes the unincorporated areas of Bloomington, Muscoy and Arrowhead Farms, the city of Rialto, major portions of the cities of Colton and San Bernardino, and a segment of the city of Fontana.
